It is up to the persons at the numbers called to Base larger batteries. The Base unit requires 4 rechargeable 2400 mAh NiMH batteries included. <http://xn--80aaeiengkwpz6p.xn--p1ai/pub/bosch-kgv28v01gb-manual.xml>

They will not. The ratings on these can be 2400 mAh or higher. When you first get your unit these batteries will probably be low, or even fully discharged and will need to be removed. Remove the cover on the bottom of the Base unit. Install the 4 batteries as shown in the plastic engraving in a few seconds after you install these, you might hear "Running on battery AC adapter. This switch should be ON at all times while the unit is in use. This switch should only be turned. Connecting the Base Unit. Power Connection. Simply plug the AC Adapter into the nearest electrical outlet. Plug the other end of the AC power adapter into the Base unit. To remove in the future, simply rotate 90 degrees counterclockwise and pull outward. Caution Do not plug the AC Adapter into an outlet which is controlled by a switch. The switch on a standard telephone line is required to use your System. Your phone will work with your existing touchtone. It works the same way as any cordless phone. NOTE Touch Tone service is required. Simply plug one end of the telephone cord into a telephone jack, and the other end into the "Line In" jack on the Base unit. Jack receptacles. If you need to plug a conventional telephone into same outlet used by the Base unit, simply plug the telephone into the Communication Protocol Options. Contact ID alarm communication protocol is not recommended for use with VoIP Voice over Internet Protocol. Presently the reliability is not guaranteed. Check with your central station. Please check. How to Handle VoIP and other Internet phones. Check with your central station for recommendations. Line Seizure. The phone plugged into the "To House Phone" jack will have the line seizure feature. This means the phone plugged into the "To House Phone" jack. This can only be done with professional installations. Caution If the Line Seizure feature is used and hooked up, verification of Line Seizure is required. The System has several features to help with the programming. The System uses voice prompts and LED lights. They give you a good audible confirmation of the progress as you are programming. Here is the key for the LEDs.

Key to LED Status Base Unit. YELLOW BACKUP BATTERY STATUS LED functions. Off. Running on Battery Power. Solid. Flashing Low or Defective Batteries. BLUE PHONE CONNECTION LED function. Normal operation. Flashing No Phone Connection Detected. Solid. Flashing. LED functions. Standby. Pendant Learning or Problem with Pendant battery or not communicating. RED POWER LED functions. AC power. Flashing Running on Battery Backup. The System must be programmed with the central station receiver telephone numbers and a 4 digit telephone number. The System can learn 2 telephone numbers the alarm receiver's. If you did not hear the number, Step 1 Write out the numbers you are wanting to program into the System. Below we will refer to the first phone number as area codes and a 1. Step 2 Establish a phone connection with your cell phone. This is done as follows. From the home phone on, answer the phone or wait until the number called answers the phone and tell the phone you are answering. Step 3 With the phone connection established in Step 2, slide the slide switch at the back of the Base unit. Step 4 Start programming the System. Push the numbers slowly and listen to the voice prompts. Follow the prompts. Do not ignore. Central Station Number, Account Code, Caretaker Telephone Number Programming. Note You will be using your telephone keypad on an open telephone line to program the System numbers. The base will speak each number that is pushed on the telephone keypad. You DO NOT have to program a Caretaker number. If no number is programmed, the Caretaker button will work the same as the Emergency button. To Change the 4 Digit Passcode. The factory default for the programming passcode is "1 2 3 4". If you wish to change this passcode to prevent unauthorized access, note there is no way to easily reset the passcode if the number is forgotten or misprogrammed, the unit will not accept a forgotten passcode. IS NOT a warranty issue. Be careful when changing programming options. Setting Programming Options.

As always First establish a phone line as you did in Step 2 on page 8. Several options can be There are nine options that you may wish to set. These are as follows. This changes the language of the voice prompts Factory setting is English. This automatically dials 9 before any of the programmed numbers Factory setting is NO Factory setting is Contact ID. This is used to temporarily disable Caller ID blocking. Consult with your central station before changing. Factory setting is NO. This feature allows the unit to call a central station, send After the base The Caretaker Sentry will then answer the next incoming call and the Customer Consult with your central Factory setting is NO. This option automatically sends Restoral messages to the central Consult with your central station This change the Periodic Test interval between Daily, Weekly and. Monthly. Consult with your central station before changing. Factory setting is Weekly. This option erases all phone numbers, account numbers and To Set the Options This feature is used to DEMO the unit without having access to a telephone line. Use this feature with a Viking Emergency Event information, hangup and then automatically answer a return call back. After the base connects Note The telephone numbers are erased, so if the Emergency button is pushed, you will hear the REMOTELY PROGRAMMING THE System. Remote Programming. Standard Method Unaided Remote Programming The Caretaker Sentry sees this ONLY if the phone only rings 1 time. If the phone rings more than 1 time, the Caretaker Sentry unit will Note The programming voice prompts will still be heard from the base while the unit is being remotely programmed. Adding Additional Pendants to the System. Note If you want to add additional pendants for a combined total of 9 follow The Pendant's unique ID code should already be learned into the Base unit when it came from the factory.

You When more than 1 Pendant is learned the base, the base unit will announce the Pendant Anytime the Pendant reports to the call center even with pendant battery status, the pendant number To program a new Pendant to the Base unit. On the Base Unit You will hear a voice prompt On the Pendant You have less than 45 seconds after pushing the RED Code Learn button on the base unit to get the pendant Te a c h i n g additional pendants does not erase previously learned pendants. It adds it to the list. The base If you hear the voice prompt "Base and Pendant Out of Range" or, "Pendant Learning Failed" an error has. Only 9 Pendants can be learned. If Pendants have been lost or replaced, we recommend you erase all pendants Simply holding down the RED Code Learn button at the back of the Base unit for 8 seconds. You will hear the After that, you can program a Basic Setup and Test. Lanyard, Wrist Strap. The System comes with 2 accessories for carrying the pendant. You can wear the Pendant using the. Lanyard or Wriststrap. Note that the Wrist Strap can also be used as a way to attach the Pendant to a wheel The image above shows the method of attaching the lanyard to the Pendant. Note that the lanyard has a breakaway feature to release if it gets caught on something while around someone's neck. System Check. The Caretaker Sentry has the ability to easily perform a full System check. Press and HOLD the CANCEL The GREEN INFO LED will turn on the base will remain in this System Check mode for 3 minutes. You can end the System Check at any time by PUSHING the CANCEL button for 1 second. The base will Push the Gray Emergency button on the pendant for 2 seconds multiple pendants can be checked during the This confirms the following. The Base unit is working. The Pendant is within range of the Base unit. The Base unit is not connected to the phone line or can not get a dial tone for some reason. This confirms one or more of the following.

If you receive a failure notification, please refer to the TROUBLESHOOTING guide on page 17 of this manual Remind your customers to perform a System Check at least twice a month. When the battery level gets to the If 4 reports are missed in a row 52 hours later, the Base This System Check feature is very useful allowing you to confirm that the System has coverage Put the base into the test mode and simply walk to the various parts If you did not hear the voice prompt, check the System more carefully. NOTE If your telephone service offers voice mail and the voice mail System uses a Stutter Dial In the event of an emergency, Operating Range. The operating range of the System will depend on many factors including intervening walls, electrical interference The System should cover

the entire home and Perform the System Check on page 15 to determine the Testing. Be sure to have your subscriber customer fully test the System with the central station. Please keep in mind when using the 433 MHz 1way pendant, the pendant will activate the base unit well beyond the voice Please consult with your customer and central Out of Service Storage or Transportation. When storing the Base unit or taking it on a trip or sending it in for repair it is recommended that you turn the. Caution If the Line Seizure feature is used and installed the installer, customer or user must verify Check the System. If it is now working skip the remaining steps. What to do. Press the Gray Emergency button and look for the RED LED to turn ON. What to expect. The RED LED on the pendant should turn ON for 2 seconds What to do. Make sure the AC Adapter is plugged into a live AC outlet and into the Base unit. Make sure the. The Red POWER LED will be on solid if the Base unit is connected to power. If the POWER light is on and the Base unit is connected to a working phone line, go on to step 4. Background information The Pendant and the Base unit are connected by a wireless radio link.

They must be They should have already been synchronized at the factory, but resetting this is What to do Follow the steps on page 14 Adding Additional Pendants to the System. Now perform the System Check test again page 15 to make sure all is well. If the System is still not working, call tech support. See page 24 for telephone number. Number of call attempts 9 times alternating between the first and second numbers programmed. Supervision of Pendants. A Pendant missing for more. Reporting of Low Pendant Battery to Central Station. Upon receipt of first "Replace Battery Now" Reporting of AC Power Loss After 8 hours Reporting of Restore Codes Only once after restore Operator Commands. It can communicate in Duplex or Simplex mode. Call starts in Duplex but can be Unlimited talk time; but System will hangup after 3 minutes of silence. Clark 5.0 out of 5 stars When my mother was diagnosed with early stages of this disease, I was at a loss. I ordered two or three books on the subject, with this being one of them. This was the BEST OF THE LOT. Easy to read and written for laymen there is

not a lot of medical jargon here. Rather in concise terms signs and symptoms are listed in chapters that allow you to read about the progression of this disease. The emphasis is on the caregiver and how to relate to your loved one. This book came in so handy over the course of my caregiving, I read it over and over. It is wonderful that a nurse wrote this in such a one on one format. He's had dementia for almost 5 years. This book is so easy to understand and covers so many aspects of memory loss. It explains the disease as well as gives comfort and knowledge to the caregiver. It really helped me.

I have shared it with my Caregiver Support group and they like it too. I believe that it highlighted several good, common sense strategies for the family member who is providing care for someone with AD. Now I hope I can get other members of my family to read it. Made me more aware of my reactions to different episodes and I now know that if I remain calm and not confrontational it helps to keep him from getting more agitated. I then started to think what exactly goes into the care of someone like that. How does one provide for the needs of those afflicted with the malady. Eileen Driscoll has written a first rate accounting of what each person needs to know about the dealings with and caring for the Alzheimers Patient. Driscoll's book is more than the simple do this do that approach, it is a heartwarming story of someone devoted to helping those much less fortunate than herself. What Driscoll brings to this book is a true sense of realism. Driscoll is a role model and hero and deserves to be recognized for her work. The book gives a helping hand, and I would have to stay, from a real expert in the field. As my grandmother had this disease also several years ago, and I cared for her also, I wanted up to date information on the disease and our options. It explained the disease and its progression, also that it is NOT a bad thing if you ask for help from professionals and friends. When a person has Alzheimers disease, the primary caretaker is usually a family member, and quite often is isolated from most outside activities. For myself, this disease is a slow grieving process, as you see that person leaving slowly, while still being here. This book is a great resource to help the caregiver in their life with the Alzheimers patient. The CareTaker sets a new standard in Continuous BP and vitals monitoring in terms of patient comfort and mobility as well as clinician productivity and automated workflow. Find out more. Okay, thanks.

They monitor birds, assess habitats, and conduct outreach and conservation activities within IBAs. To view a list of IBAs and their Caretakers in BC, [click here](#). With support from Nature Canada and Bird Studies Canada, all other provinces in Canada have now initiated caretaker networks of their own. You can get involved by helping an existing Caretaker, or by becoming a Caretaker for a site that still needs a Caretaker. For more information, contact the IBA Caretaker Coordinator at iba@bcnature.ca. This annual report should document key changes in the state of the IBA bird use, habitat, land use as well as changes in conservation threats and conservation action. Caretakers are encouraged to submit their observations by email to iba@bcnature.ca using the Annual Report Form see below by January 31st of the following year; however, reports in other formats or reports submitted after January 31st are also appreciated and accepted.
